

**Special saw blades PI-519** with high teeth number and special V-top tooth shape (GV). They are designed for clean cutting across the grain of solid wood with very high feed speed on automatic lines.

Special tooth shape allows for precise and clean (without ripping) double-side formatting of furniture elements from solid (soft and hard) wood as well as glued wood.

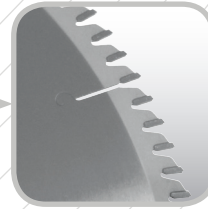

**Type of cut:**

- cross-cut.

**Material:**

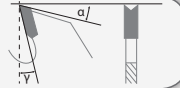

- solid soft wood,
- solid hard wood,
- glued furniture board.

**Tooth type:**

- straight, V-top teeth (GV)

**GV**
